

Shapes and Measures: Super Challenge 2

- 1 Look up the definition of 'measure' on page 30 of the *Oxford First Illustrated Maths Dictionary*. Scales are used to measure how heavy something is. Find the definition of 'heavy' in the dictionary, then put the objects below in order from lightest to heaviest on the scales.

elephant

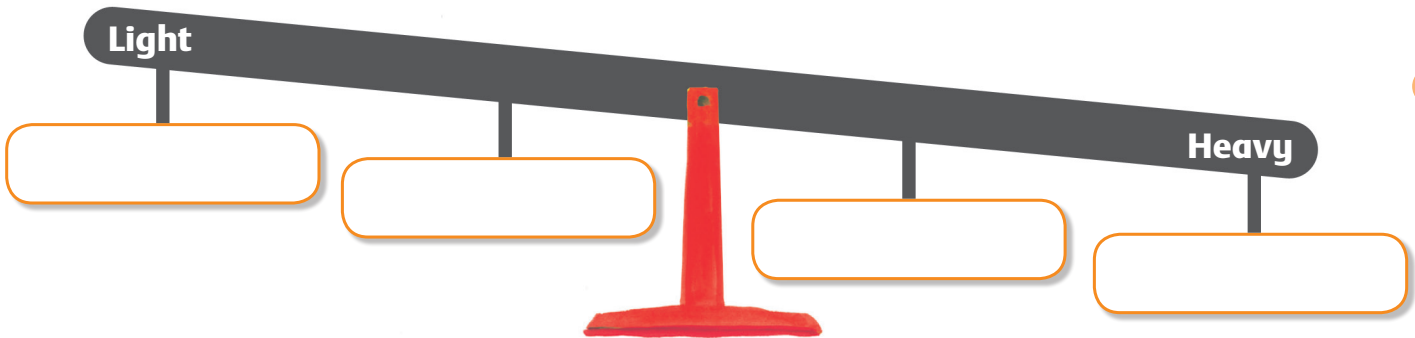

mouse

balloon

car

- 2 Now look up the definitions of 'long' and 'short' in the dictionary. Use a ruler to measure the pieces of string below then record the measurements next to each piece of string.

.....

.....

.....

.....

- e) Which piece of string is the longest?

.....

- f) Which piece of string is the shortest?

.....
