

Below are some activities your child could do at home:

Incredible Inventions

Have a look around your house! Can you see something that you think is an incredible invention? Create a still life portrait of this object and then write about why you think it is incredible.

Neil Armstrong

This term we should be learning about significant people in our history lessons. Research Neil Armstrong. You could create a fact file, poster, report or drawing about the information you find.

Art

Create a landscape painting of space!
What colours and shapes could you use?
Use techniques we have learnt to help you!

D&T

Create a 3D model of a space rocket. Can you plan it first by drawing and labelling the parts? Write a list of the materials you can use (talk about this to the adult) you will then be ready to build your rocket!

I would love to see your creations – adults can send photos to the school email address.

PSHE

Read a story with an adult at home. Can you talk about how the character is feeling at different points in the story? Can you think about times when you have felt like this and talk about it to your adult?
