

Summer 2 – topic activity ideas

Below are some activities your child could do at home:

Lego

This term we should be learning about inventors in our science lessons. Research who invented Lego! You could create a fact file, poster, report or drawing about the information you find.

Lego

Create Lego figures, scenes, objects using your own plans and ideas. Plan what you are going to create first! Think about colours, shapes and number of pieces you will use.

(Adults can send pictures of models to the class email)

Boats

Design your own boat. Think about the best materials to use. What do boats need? Do the materials need to be waterproof or not?

You could go on to create a model of your design!

PSHE

Talk about the story 'Smartie the Penguin'. Discuss how they can keep themselves safe when online. Create a picture of poster.

(This is a story that the children should be familiar with.)

Art

Create a portrait picture of Christopher Columbus.

Remember to use the techniques you have learnt: sketch, draw, light, dark, tone, shade, short lines and long lines.
